Continuation of 11. does NOT place the application in condition for allowance because: in response to the argument with regards to the difference between the reference's teaching of "terminal and/or network capabilities" and the applicant's "media characteristics" as to enable "determining whether the message should be transcoded to accommodate the multimedia expandabilities of the receiving terminal" (see page 2, lines 28-31). As such Christopoulos (Patent 78-9) clearly and explicit teach this broad limitation (see Final Office Action mailed May 23, 2008). Christopoulos further teaches that this information is either provided to the external device (i.e. inserted into the message) or stored (see cd-1/ lines 8-12). Although the overall invention might be different from the reference, such distinguishing characteristics in terms of functionality must be clearly recited in the pending elaims. During patternt examination, the pending claims must be given their broadest reasonable interpretation consistent with the specification. See In re Hyatt, 211 F.3d 1367, 1372, 54 USPQ2d 1664, 1667 (Fed. Cir. 2000). Furthermore, while the claims of issued patents are interpreted in light of the specification, prosecution history, prior art and other claims, this is not the mode of claim interpretation to be applied during examination. During examination, the claims must be interpreted as broadly as their terms reasonably allow. See In re American Academy of Science Tech Center, F.3d 2004 WL 1067528 (Fed. Cir. May 13, 2004).
